To whom it may concern:

9. September 1999

Dr. Jens Fromholt Larsen, now consultant surgeon in Aalborg, served in this department as registrar from 1. July 1978 to 30. June 1981, and as senior registrar from 1. July 1987 to 31. July 1989.

Already then he was a dedicated surgeon, highly motivated and technically skilful, especially interested in gastroenterology, but also engaged in urological work.

Being a junior colleague he also became a good friend, thanks to his straight character and loyalty - and his sense of humour. His relations with patients and staff were excellent, and I recommend him with pleasure to the position he applies for.

I am pleased to testify that Jens Fromholt Larsen was senior registrar in the Department of Surgery L, Amtssygehuset, Aarhus University Hospital during the period 1.4.92 - 31.3.93.

Jens Fromholt Larsen was as a senior registrar an excellent clinician and surgeon with very good relation to patients, colleagues and the nurses.

I can only give Jens Fromholt Larsen my very best recommendations.

Yours sincerely

To whom it may concern

September 17th 1999

Since April 1993 Jens Fromholt Larsen has been working as a consultant surgeon at the Department of Surgical Gastroenterology. The department has been structurally divided into upper G-I surgery (biliary tract, pancreas, stomach and minimally invasive surgery) and colo-rectal surgery since 1998. Since then Jens Fromholt Larsen has been attached to the upper section besides being responsible for the expansion of the laparoscopic surgery of the Department.

Jens Fromholt Larsen is a competent and diligent clinician, who through independent studies, courses, and international congresses has continuously perfected his knowledge. As a surgeon Jens Fromholt Larsen is known as very skilful with great experience within G-I surgery.

In addition to the clinical work Jens Fromholt Larsen has been deeply engaged in the education of young surgeons and has been the architect of an experimental laboratory for surgeons in training at Aalborg Hospital.

Within the field of research Jens Fromholt Larsen is active and is well-reputed as an initiator and supervisor for young surgeons.

Personally, I consider Jens Fromholt Larsen a valuable member of our team of consultant surgeons at the department of surgical gastroenterology, in particular concerning the continuous progress of our department. I highly value his enthusiasm and loyalty.

Yours sincerely
